Tap & Go[®]

The easiest way to visit
the THREE PEAKS

What's behind such a simple gesture

The logic behind the EMV-EuroPay Mastercard and Visa system is to charge at the end of the day the optimal fare according to the taps made by each passenger.

The payment by card, called **Tap & Go**[®], allows the use of:

- ▶ bank cards (credit cards, prepaid cards and debit cards) issued by Mastercard/Maestro, Visa/V Pay/Visa Debit;
- ▶ virtual cards on smartphone or smartwatch G Pay/Apple Pay.

How does it work?
It's very easy!

Tap & Go®

FOR THE SINGLE PASSENGER:

- ▶ Hold your card close to the validator and TAP
- ▶ Wait for the validator's vocal response
- ▶ **Have a good trip**

Every time you use the bus throughout the day, remember to 'tap'; any tap made within the validity of the ticket does not constitute a new payment.

At the end of the day, a single one-day ticket will be deducted for each passenger (10,00 Euro per person per day).

A maximum of five tickets may be purchased per bank card per day.

How does it work? It's very easy!

Tap & Go®

FOR MORE PASSENGERS:

- ▶ The system allows each card to purchase several tickets, e.g., for families.

There are two possible ways:

- tap the card on the validator once for each person, within 5 minutes after the initial tap
- or
- select the number of passengers for whom you intend to purchase the tickets and then tap the card on the validator

- ▶ **Have a good trip**

Every time you use the bus throughout the day, remember to 'tap'; any tap made within the validity of the ticket does not constitute a new payment.

At the end of the day, a single one-day ticket will be deducted for each passenger (10,00 Euro per person per day).

A maximum of five tickets may be purchased per bank card per day.

Checking possibilities

What and how the customer can check:

- ▶ The charge is made directly on the bank account linked to the used card and it is possible to check the travel history through a dedicated website (<https://tap.dolomitibus.it>).

What Dolomiti Bus can check:

- ▶ Checks by Dolomiti Bus Customer Assistants are carried out with the utmost respect for privacy: the device used by the inspectors operates by verifying the last four digits of the card or by reading the card via NFC.
